

# CS3305-01 Homework #5

## Requirements

The goal of this assignment is to reinforce linked lists in C++. Do programming projects 2 and 7 on page 287 of text. Put the required function in "main" and use [node1.h](#) and [node1.cpp](#).

## Submitting Assignment

Submit your assignment as a word document through D2L using the appropriate assignment link. Make sure your word document has a screen shot and copy paste the code in the Word file. Be sure to include comments in your files documenting your name, the assignment and the class.
